Dear Bending Spoons Hiring Team,

I am excited to apply for the Software Engineering Intern position at Bending Spoons. With a strong foundation in web development and a passion for learning, I am eager to contribute to your team while further developing my skills in software engineering.

I recently completed a Full Stack Web Development Bootcamp through Edinburgh University and HyperionDev, where I gained hands-on experience in the web development lifecycle. This program equipped me with practical coding skills and a solid understanding of software development principles. These experiences have honed my technical aptitude, attention to detail, and ability to collaborate effectively—qualities I believe align closely with the requirements of this role.

This internship offers an incredible opportunity to work alongside experienced professionals and contribute to building robust, high-quality products. I thrive in environments that challenge me, require adaptability to new tools, and foster continuous learning, and I am confident this aligns perfectly with the culture at Bending Spoons.

I am highly organized and detail-oriented, with strong communication skills that allow me to articulate ideas clearly, both verbally and in writing. My enthusiasm for software engineering, combined with my ability to learn quickly and deliver results, positions me as a candidate who can make meaningful contributions to your team.

In addition to my bootcamp experience, I have completed several online courses in web development, further solidifying my technical foundation. I consistently practice and refine my skills on a daily basis, ensuring I stay up-to-date with industry trends and best practices.

I would welcome the opportunity to discuss how my skills and passion align with the goals of your team. Thank you for considering my application. I look forward to the possibility of contributing to Bending Spoons as a Software Engineering Intern and embarking on this exciting journey.

Respectfully,

Tamar Kikalishvili
